

# Multi-Target & Multi-Detector People Tracker for Mobile Robots

## MOTIVATION & OVERVIEW

## TRACKER

MAIN LOOP:

FOR each target

**Prediction:**

- People Motion (Person motion model)
- Platform Motion (Odometry)

END

■ **Occlusion Prediction**

■ **Data Association** (Detections vs Targets)

FOR each target

FOR each detector

FOR each associated detection

FOR each particle

■ **Correction**

END

END

END

END

END

END

END

END

END

END

END

END

END

END

END

END

END

END

END

END

END

END

END

END

END

END

END

END

END

END

END

END

END

END

END

END

END

END

END

END

END

END MAIN LOOP

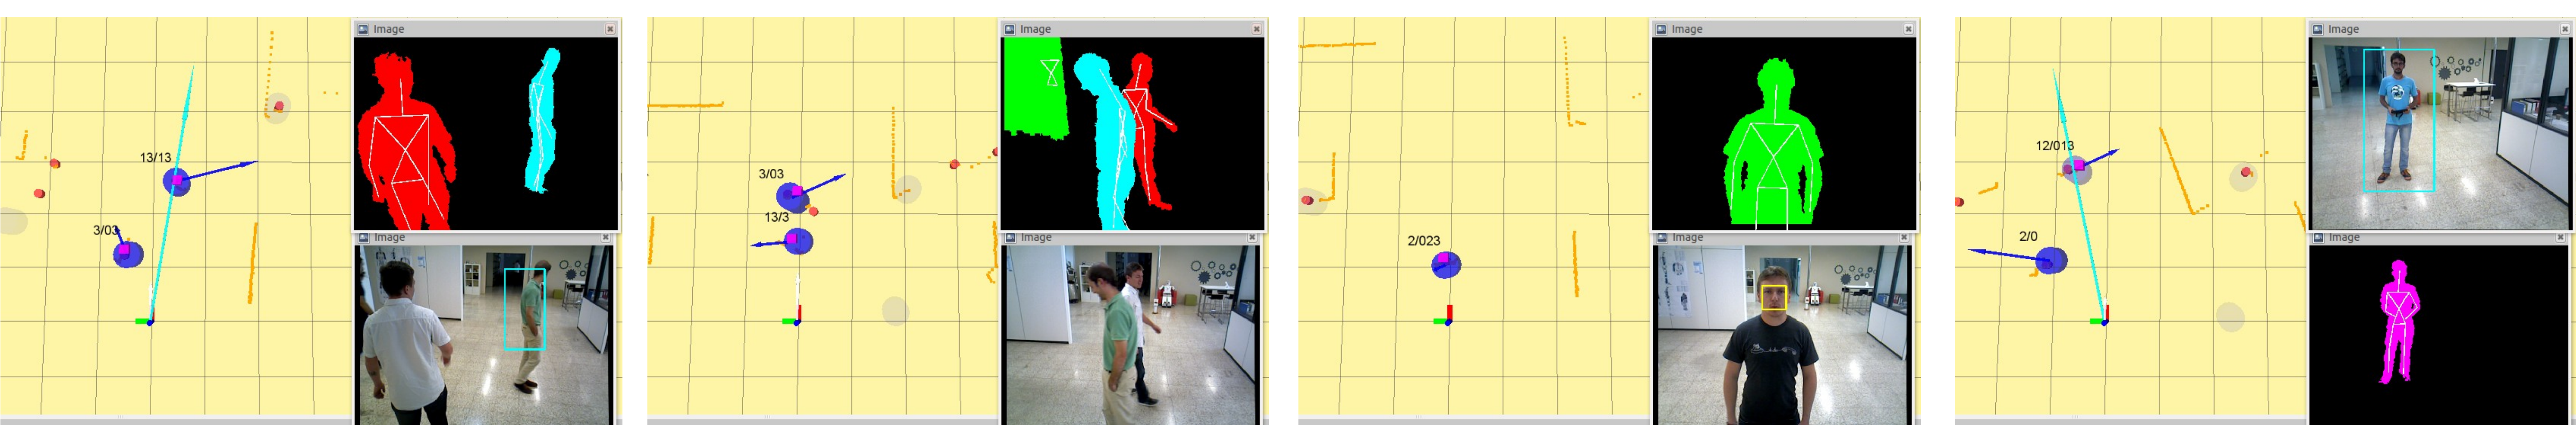

## IMPLEMENTATION

## EXPERIMENTAL RESULTS

Ground Truth Annotation with ROS Interactive Markers

People tracker common situations in mobile robotics: crossings, multi-detector responses, false positives, out of sensor field of view.

**SENSOR FUSION EXPERIMENT**

	Dataset A			Dataset B			Dataset C		
	ALL	LBF	LS	ALL	LBF	LS	ALL	LBF	LS
MOTP	0.14	0.11	0.15	0.15	0.18	0.14	0.16	0.14	0.16
MOTA	0.69	0.63	0.71	0.31	0.15	0.32	0.66	0.32	0.61

**DATA ASSOCIATION EXPERIMENT**

	Dataset A		Dataset B		Dataset C	
	MHT	NN	MHT	NN	MHT	NN
MOTP	0.14	0.15	0.15	0.15	0.16	0.15
MOTA	0.69	0.34	0.31	0.21	0.66	0.56

ALL: all detectors  
L: Leg detector  
B: Body 2D detector  
F: Face detector  
S: Skeleton (NiTE) detector  
MHT: Multi-Hypothesis Tree  
NN: Nearest Neighbor
